Astro
Forecast

ASTROFORECAST.CO

Hello cosmic seeker!

Astrology is the understanding that time flows in continual cycles, and predicting the future is as simple as looking back to the past. The astrology of 2023 indicates that we are due for a major cultural change — one that hasn't been seen in hundreds of years. We are about to see what the Twenties will truly be about!

This report will give you the big picture of what to expect in 2023 and beyond, helping inform your actions and decision-making so you can feel supported by the universe as we move deeper into the Aquarian Age.

Through this forecast, I hope to help you make sense of these changing times and the uncertainty swirling all around us, which can seem quite scary and alarming but also gives us a chance to create the new reality we wish to see for ourselves and our world. Unprecedented times bring once-in-a-lifetime opportunities!

To greater health, wealth, sovereignty, & personal freedom,

Cho Hwang

THE ASTRO FORECAST

TABLE OF CONTENTS

Yearly Overview	4
Saturn: Our Collective Challenge	5-8
Jupiter: Our Path of Expansion	9-11
Pluto: Our Cycle of Evolution	12-15
Nodes: Aligning to our Destiny	16-18
Year At-A-Glance	19-20

2023 YEARLY OVERVIEW

Welcome to 2023! After an explosive start to the new decade, we are now moving further away from the initial shock of 2020 and drawing closer to a turning point that will determine the new types of energies, attitudes, and leaders that will come to dominate the decade. A new culture is coming into existence, fueled by the desire for greater freedom, sovereignty, and transparency. 2023 will reveal where that culture is headed.

The hallmark of 2023 is a record number of outer planets changing signs, bringing fresh energies that we haven't felt in years, decades, and even centuries. We are downloading new ways of being that separate us even further from worlds of the past. The "old world" comes into question as Saturn enters Pisces, challenging things we blindly believed to be true. Autonomy and self-reliance become accessible as the North Node enters Aries, making it easier to carve our own path. And the overall tone is quite revolutionary as Pluto dips into Aquarius, kicking off a cultural revolution that will define the next two decades.

Overall, 2023 asks us to remain neutral and open-minded about things that come into question as many illusions are being shed in the next few years, while also asking us to take initiative and do things on our own terms with full confidence in the universe. It's going to be an empowering year!

OUR COLLECTIVE CHALLENGE

SATURN is the planet of challenges, limitations, reality checks, and hard-learned lessons. Stern Saturn asks us to slow down and face reality through a more critical and realistic lens. The sign of Saturn represents our collective challenge at this moment and the lessons we are learning as a whole in our quest for societal advancement.

Saturn in Aquarius (2020-2023)

Since March 2020, Saturn has been moving through **AQUARIUS**, the sign of friendship, community, social structures, and group progress. Aquarius is the one who seeks to make the world a better place for all. Saturn has been asking the tough questions here — are we cohesive as a society? Do our social structures actually support us? Is equality and autonomy a priority? Are we united on collective progress, or falling victim to self-isolation, radical factions, and extremist views? (the shadow side of Aquarius).

On a personal level, we have been turning a critical eye to our friends, social circles, and community involvement, facing reality here and dealing with any imbalances to cut out toxic friendships, release social expectations, join like-minded groups, and take greater responsibility for our communities. We have also been reevaluating our hopes & dreams, another Aquarian focus, to see if they are aligned to the future unfolding in front of us rather than being tied to a world of the past.

Saturn often acts to limit or constrict matters of the sign he is in. In Aquarius, it was said that Saturn would limit social activities, friendship, and community cohesion. We have seen this play out on a global scale through the global pandemic — coinciding with Saturn's entrance into Aquarius in March 2020 — which brought new realities such as social distancing, masking, self-isolation, and Zoom meetings. Saturn's fingerprints are very clear!

At the same time, through forced isolation, many of us were able to awaken our sense of community

ABOUT

Saturn is the planet of challenges, limitations, hard-learned lessons, and responsibility. Saturn moves into a new sign every 2.5 years, bringing a new type of challenge in a different area of society.

IN 2023

Saturn in Aquarius
and Pisces

purpose and what we are here to contribute to the world while also feeling more empowered to do our own thing without worrying about what others may say (the best side of Aquarius). From the George Floyd protests to the Great Resignation, millions of us have been connecting to our inner rebel and revolutionary.

Saturn in Pisces (2023-2026)

We will continue to have radical Aquarius energy for a while, but on March 7th, 2023, Saturn will move into spiritual Pisces, to stay until February 2026. This means our collective focus will shift from community to spirituality as Saturn urges us to get more real about matters beyond the physical and material realm.

PISCES is the sign of spirituality, transcendence, healing, mental health, addictions, drugs, and hospitals. Glamorous Pisces also rules art, dance, music, celebrity, and Hollywood.

Neptune has already been in Pisces since 2012, coinciding with a growing interest in meditation, yoga, and spirituality. We can see Neptune's fingerprints in the meteoric rise of spiritual topics in the last decade, such as astrology, starseeds, ayahuasca, and the Law of Attraction. But while dreamy Neptune uplifts Pisces, she also casts a foggy veil over the sign, making it harder to discern between what is real and what is fake.

When Saturn enters Pisces in 2023, we will be challenged to approach Pisces matters through a more critical and realistic lens, rather than being blinded by Neptunian daydreams. Get ready for the bubble to burst! We can expect the shattering of illusions, fantasies, and false prophets as Saturn opens our eyes to the reality of what we believe to be true.

It's time for some tough questions — are we putting our faith in the right things? Can we trust those who proclaim to have all the answers? Are we taking responsibility for our own healing? What is our spiritual truth?

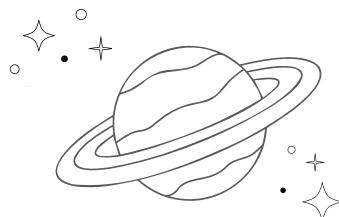

KEY DATES

March 21, 2020: Saturn enters Aquarius

March 7: Saturn enters Pisces

April 13: Saturn sextile North Node

June 19: Saturn sextile Jupiter

If Saturn in Aquarius is a test of community, Saturn in Pisces is a test of *faith*.

Key areas being tested include spirituality, religion, New Ageism, Hollywood, celebrity culture, mental health, addictions, psychedelics, and the state of our oceans.

The next few years will bring a reckoning for mass illusions and those who perpetuate them falsely. In 2023, we can expect to witness the seeds of change as people start speaking out against scams, frauds, and false prophets. Anything that is deceptive, manipulative, or too-good-to-be-true is ready to be exposed.

This will especially affect traditional religion and Christianity – highly associated with the Pisces Fish – but also New Age spirituality and modern belief systems. We can also expect a shakeup of Hollywood and celebrity culture, which has morphed into something like a religion in the last few decades. Medicine and hospitals may also come under fire.

In general, we may see mainstream debates over the question of our existence and the true meaning of reality. Do we have a soul? Are we living in a hologram? Does life start at conception? Are aliens real? Those are some of the debates that may erupt on a public scale.

Examples of what to expect can be seen in Saturn's transit through Pisces from 1964 to 1967. During this time, the Roman Catholic Church was under fire for their stance on birth control and contraception, as the Pill was rising in popularity. The church convened the Pontifical Commission on Birth Control between 1963 to 1966. Two years later, Pope Paul VI moved to ban all forms of birth control, leading to outcry from both priests and the public.

Another example is the iconic TIME's cover of April 1966, which boldly asked the question, "Is God Dead?" This led to countless angry sermons and a national debate over the relevancy of God and religion.

As Saturn bursts bubbles and illusions, the next few years may feel a little too real, depressive, or hard to accept. Saturn is testing things we believed to be true and it can be hard to accept the disillusionment of something we loved. Guarding against depression and melancholy will be important during these times.

But while the shadow side of Saturn in Pisces is a test of faith, the higher side is a greater commitment to our spiritual truth and healing journey. Saturn brings the opportunity to become more grounded, disciplined, and mature in our beliefs and self-care. False spirituality is exposed while true spirituality becomes fortified and mastered.

Rather than following viral trends or clout gurus, we are ready to become more studious and self-directed in forming our own beliefs while also taking a more practical approach to our intuition and manifestations. This may look like structured routines, daily rituals, earthy practices, and organization tools that support your expression of faith & magic. Saturn aims to make things more tangible and real. If you can provide this service to others, you will rise as a leader!

On a personal level, Pisces rules the **12th House of the Subconscious and Spiritual**. This is also known as the house of Undoing. Saturn will ask us to address self-sabotaging behaviors that lead to our undoing, such as addictions, escapism, self-destructive acts, health issues, falsely-held beliefs, and subconscious habits and patterns.

Expect any issues here to rise to the top of your priority list in 2023 and beyond as Saturn calls attention to your own undoing. It will be important to take purposeful & deliberate action rather than hoping for something to happen but never doing anything about it. Saturn rewards self-discipline, mature approaches, hard work, and taking responsibility for yourself. If done right, you will feel a huge weight come off your shoulders!

Overall, Saturn in Pisces asks us to check our blind faith and question things we may have once believed to be true, while also bringing the opportunity to affirm our faith in things that resonate with us in an authentic way. Matters of spirituality, imagination, and the astral realm become more practical, grounded, and real. By the end of this transit, we will feel a more tangible connection to our own spiritual nature and be able to express it in ways that make a greater impact on the physical world.

.....

OUR PATH OF EXPANSION

JUPITER is the planet of luck, success, growth, and natural expansion. Larger-than-life Jupiter encourages us to live out loud, believe in ourselves, and take bold leaps of faith. The sign of Jupiter represents the type of energy that is currently bringing us opportunities for greater growth and expansion. Leaning into this energy will help you expand beyond what you thought was possible!

Jupiter in Aries (2022-2023)

Since May 2022, Jupiter has been moving through **ARIES**, the sign of independence, self-reliance, entrepreneurship, and fresh starts. This has been helping many of us feel excited to take initiative and pursue a new path in life, rather than wait around for someone to give permission. Jupiter has awakened our personal courage and inner pioneer. We have been learning how to embrace our role as the creator of our reality and design a life based on passion, purpose, and creative expression, rather than a self-defeating acceptance of the status quo.

Areas of luck have included entrepreneurship, self-guided ventures, doing things on your own, passion projects, healthy competition, and leadership.

In the first half of 2023, we are encouraged to continue diving into our enterprising ideas and take greater initiative in our work & personal life as we will attract bigger opportunities by stepping into a forward-facing role and emitting the vibe of an initiator or leader. This is a powerful period for brainstorming new ways to reinvent your life, without being too worried about how it will all come together (this will come in the second half of the year!)

The Jupiter-Chiron alignment on March 12th will open a powerful gateway for healing any wounds related to your ego, courage, confidence, and ability to lead. Your insecurities may be exposed around this time but you will also gain awareness of the core thoughts & beliefs that are perpetuating this insecurity, and what you can do now to rewrite them into a more empowering stance.

ABOUT

Jupiter is the planet of growth, expansion, luck, success, & possibility. Jupiter moves into a new sign every year, bringing new opportunities and new ways to grow and expand effortlessly.

IN 2023

Jupiter in Aries
and Taurus

The Aries Solar Eclipse on April 20th will open a portal for explosive beginnings and fresh starts. Use this moon to set intentions for greater independence, self-reliance, and personal growth. Eclipse energy can rocket-launch you towards your desires! However, we may find ourselves being stretched beyond what is comfortable as the moon makes a tense square to Pluto. An old version of ourselves or our desires may need to be shed in order to see what we are truly capable of.

We will continue to have Jupiter in fiery Aries for a while, but on May 16th, Jupiter will move into earthy Taurus, to stay until May 2024.

Jupiter in Taurus (2023-2024)

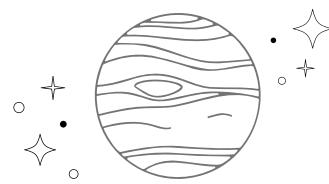

TAURUS is the sign of practicality, hard work, tangible results, and getting the job done. If Aries is the seed of idea, Taurus is the fertile soil that helps them grow. This means we must start moving on the ideas we had in the first half of the year and make meaningful progress through steady work and concrete plans of action.

From May 2023 onward, we will experience the most success when we break down our goals into clear, actionable steps and then take daily action to chip away at them in small but cumulative ways. Jupiter in Taurus encourages us to create a plan with measurable outcomes so we can have an idea of where we are in the process, rather than getting overwhelmed by the amount of things to do. Turning dreams into reality, one brick at a time.

Keys to success include clear goals, well-thought-out plans, and slow and steady expansion rather than rushed growth. Taurus embodies the wisdom of patience and delayed gratification. We will attract good fortune by taking the leisurely route and giving ourselves plenty of rest. Work on living a more slow, sensual, and simple life, rather than trying to force things to happen before they are ready. We will also find greater success by maximizing our resources to the fullest, including our money, energy, and time. You may need to cut out things that waste time or don't provide a good return on investment, such as a social media addiction or toxic friendship.

KEY DATES

- March 12:** Jupiter conjunct Chiron
- May 16:** Jupiter enters Taurus
- May 17:** Jupiter square Pluto
- June 1:** Jupiter conjunct North Node
- June 19:** Jupiter sextile Saturn

With Jupiter opening new paths of prosperity in Taurus, we may be able to achieve success or make money in the realms of food, agriculture, nature, sustainability, beauty, art, craftsmanship, money matters, investments, and the stock market.

Taurus is a crafty builder and DIY ventures such as those on Etsy or eBay can find lucrative success during this time. High-quality materials, hand-craftsmanship, and sustainable approaches are favored. Products related to beauty and aesthetics can also do well, with Taurus ruled by lovely Venus.

Food, agriculture, and farming will also receive a boost from Jupiter and hopefully we will see a reprieve in the farmer's protests going on around the world. While Jupiter expands, he can also make us go overboard, and the shadow sides may be food hoarding, farm takeovers, or out-sized crops that go to waste. For those who want to get into food or farming realms, this is a great year to dive in and even sell your knowledge.

Finally, we may see a boom in financial matters as Jupiter brings expansion to Taurus, the sign that rules the **2nd House of Money, Possessions, & Resources**. This can expand our income streams and bring new money-making opportunities, especially when we take patient, calculated risks and make the most of what we already have. Try doing a yard sale, investing in the stock market, selling something you already do anyways, or trading services. Taurus knows how to maximize their resources! The Jupiter-Pluto square on May 17th may bring exaggerated and even irrational growth in money matters.

Overall, Jupiter in Taurus encourages us to invest in *ourselves* in a greater way, through our time, money, and resources. Give yourself what you need to feel more stable, supported, and deserving of greater riches. Cultivating self-worth is a powerful fuel for our success in 2023!

The Taurus New Moon on May 19th is a stellar time to set intentions for personal & spiritual wealth, as this lunar cycle will culminate with a powerful, manifesting Taurus Lunar Eclipse on October 28th. Also pay attention to the Jupiter-North Node conjunction on June 1st, which may reveal new paths of prosperity that you didn't know were possible for you.

OUR CYCLE OF EVOLUTION

PLUTO is the planet of death, rebirth, and transformation, representing things that must “die” or be uprooted for something better to be reborn. As the ruler of the Underworld, Pluto dredges up the dark underbelly of society to help us see what is rotting and no longer supporting life. The sign of Pluto represents the area of society where Pluto reveals this darkness and uncomfortable truth. It is also the area where he ushers in a global shift in the balance of power.

As the outermost “planet” in our solar system, Pluto moves very slowly and only enters a new sign every 20 or so years. Since January 2008, Pluto has been moving through Capricorn, the sign of governments, corporations, business, global institutions, and world leaders. **CAPRICORN** rules the traditional pillars of society and Pluto has been dredging up darkness here, helping us see corruption, exploitation, dictatorship, and other abusive behaviors that have been hiding in the dark for quite some time.

Pluto in Capricorn (2008-2024)

We can clearly see Pluto's fingerprints in our societal crises since 2008. Pluto's entrance into Capricorn coincided with the global financial crisis of 2008, which brought major banks to their knees and revealed shocking abuses in the real estate industry. We also saw Barack Obama becoming America's first black president that year, shifting the traditional balance of power in government. In 2016, we saw the rise of Donald Trump and the desire for a strongman or savior. In 2017, we saw the explosion of the #MeToo movement leading to a takedown of prominent men in power. In 2020, we saw a record number of CEOs stepping down from top companies, bringing greater shifts in the balance of power.

The positive side of Pluto is that darkness gets revealed and corruption is uprooted. However, the shadow side of Pluto is that those unfairly in charge try even harder to maintain their power. Something is exposed and empowered at the same time. Evolution is never linear in Pluto's eyes.

ABOUT

Pluto is the planet of transformation, evolution, and rebirth. Pluto moves into a new sign every 20 to 30 years, bringing crises that help us evolve onto the next level of our natural growth cycle.

IN 2023

Pluto in Capricorn
and Aquarius

Even after a complete financial meltdown in 2008, the banks responsible for the crisis were eventually bailed out and not a single Wall Street executive was charged, while millions of people lost their entire savings due to the actions of a corrupt few. In 2011, the U.S. Supreme Court passed *Citizens United* which ruled that “corporations are people,” leading to an explosion of corporate influence in elections. In 2020, we saw wealth inequality explode after the pandemic recession, along with governments like China using the pandemic to exert totalitarian control. These are some of the negative manifestations of Pluto in Capricorn.

Pluto will remain in Capricorn until November 2024, but in 2023, he will briefly enter Aquarius in March before retrograding back to Capricorn in June. In November 2024, Pluto will enter Aquarius fully, to stay until 2044.

Pluto in Aquarius (2023-2044)

We have not seen Pluto in Aquarius since the 1770's. This is radically new energy that no one alive today has witnessed in their lifetime. Something is bound to change.

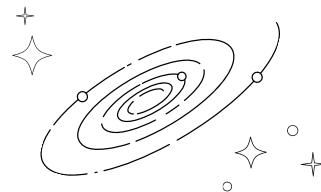

AQUARIUS is a humanitarian sign ruling friendship, community, group efforts, and social camaraderie, while also a scientific sign ruling technology and innovation. In society, Aquarius shows up as the bottom 99%, we “the people”, social welfare, social justice, politics, crowd-sourcing, the internet, and scientific breakthroughs.

If Capricorn represents tradition and conservatism, Aquarius represents progress and innovation. Capricorn is about respecting the past while Aquarius is about inventing the future. Capricorn is about top-down structures while Aquarius is about flat and equal networks. Aquarian energy is radical, revolutionary, and unapologetically irreverent.

While Pluto in Aquarius is a long-term transit that will span over 20 years, the keynote of this time is **power to the people**. Pluto will bring the same power, control, and strength to the bottom 99% as

KEY DATES

- March 23:** Pluto enters Aquarius
- May 17:** Pluto square Jupiter
- June 11:** Pluto Retrograde enters Capricorn
- July 29:** Pluto square North Node

he did to governments and corporations in the last decades. After years of power becoming more concentrated at the top, it is about to flow down in ways we haven't seen in over 200 years.

The last time Pluto was in Aquarius was between 1777 to 1798. During this time, the world witnessed the American Revolution as our forefathers chose to reject British rule and overthrow the monarchy in favor of a liberal democracy. We also saw the French Revolution take place as French peasants rose up against the monarchy to protest high unemployment, rising food prices, a regressive tax system, and massive inequality. The French battle cry of "Liberty, Equality, and Fraternity" is exquisitely Aquarian. We also saw numerous scientific breakthroughs during this time, including the height of the industrial revolution and the discovery of Uranus using a telescope in 1781.

But while **people power** is the main theme, it may not unfold in the ways we expect now. Pluto empowers but also exposes matters of Aquarius. This means certain social organizations and welfare schemes are likely to come under fire for manipulation and deceptive tactics, along with social justice causes that use the guise of progress to push agendas or incite anger and division. Populist or third-party movements are likely to grow in strength and reach top levels of government, while also becoming bullheaded and even tyrannical.

Renowned astrologer Steven Forrest notes that Aquarius represents liberal ideas and the Democratic Party while Capricorn represents traditional ideas and the Republican Party. During Pluto in Capricorn, we saw the complete takeover and transformation of the Republican party led by Donald Trump. Is the same in store for Democrats? The worst forms of identity politics and "wokeness" may be exposed during this time.

Beyond politics, we can expect to see major scientific and technological breakthroughs in the next 20 years, especially in Pluto matters of sex, disease, genetics, death, and things unseen to the naked eye. The internet is also likely to go through a complete transformation. The internet is highly Aquarian — a decentralized network of computers that distributes information (mostly) freely and equally. However, currently, it is co-opted by mega corporations who push deceptive algorithms and corrupt data-harvesting practices. This will need to change as Pluto pushes us to shift the balance of power.

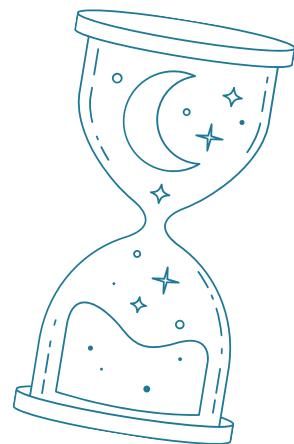

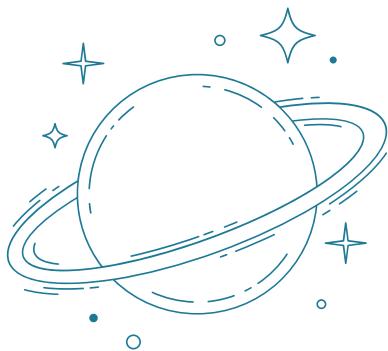

On a more personal level, Pluto in Aquarius empowers us to release societal expectations and traditional ways of thinking in favor of true individuality, uniqueness, and authenticity. We are encouraged to march to the beat of our own drum despite what others may say. While Aquarius is a very group-oriented sign, it is also highly independent and individualistic, and Aquarius knows we cannot be truly united as a society until we give everyone the freedom to express their unique light.

.....

With Aquarius ruling the **11th House of Friendship & Community**, we may need to reevaluate the people and groups we choose to associate with and work on building healthier connections based on shared interests and visions for the future, so we can feel accepted for who we truly are rather than changing ourselves to fit in.

Aquarius upholds the weirdos, black sheeps, and revolutionaries – don't be afraid to be one!

Overall, Pluto in Aquarius is a once-in-a-lifetime event that will remind us of our right to liberty, equality, community, and self-government. After years of trickle-down control, we are about to witness a massive shift in who gets to have the power. In 2023, we will get a sneak peek into what the next two decades have in store as Pluto briefly enters Aquarius from March to June. Pluto will spend that time at 0 degrees of Aquarius, signaling the explosive birth of radical Aquarian energy.

ALIGNING TO OUR DESTINY

The Nodes of the moon are spiritual and karmic points that represent the way we are meant to evolve as a collective soul. The **NORTH NODE** points to our future destiny and the direction we are learning to embody and grow towards at this point in time, while the **SOUTH NODE** points to our karmic past and the unnecessary baggage we are working to heal and release on a collective scale. The North Node represents where we are headed while the South Node represents what we are shedding. The Nodes always travel in opposite signs.

North Node in Taurus, South Node in Scorpio (2022-2023)

Since January 2022, we have had the North Node in **TAURUS** and South Node in **SCORPIO**, delivering fated lessons and changes in these signs. Taurus-Scorpio represent the axis of money and we have been learning how to create our own sense of security and abundance by making the most of what we already have and buckling down to do steady, patient, and diligent work, rather than expecting someone else to provide the security we crave. We have been learning how to be more self-sufficient and practically-minded, especially when it comes to money and food, which may have looked like learning how to cook for yourself, eating in rather than dining out, opening a savings account, learning how to invest, or growing a garden to produce your own food. The Taurus vibes of earthiness, nature, self-reliance, and slow and sensual living have come into fashion in a big way.

With the South Node in Scorpio, we have been challenged to face our deepest fears, wounds, and triggers in a more real & honest way by confronting those issues head-on, rather than letting them fester in the dark. It has been a big year for facing our shadows and bringing darkness into the light, which may have looked like finding a therapist, starting a journaling practice, having tough conversations, cathartic cries, being more honest with yourself and others, or doing something you were always afraid of. We have been learning how powerful we truly are!

ABOUT

The North Node represents our future destiny and path of highest growth while the South Node represents our karmic past and path of soul healing. The Nodes move into new signs every 18 months.

IN 2023

Nodes in
Taurus-Scorpio &
Aries-Libra

While these themes will continue to percolate in 2022, in July 2023, the North Node will shift into Aries and the South Node will shift into Libra, where they will remain until January 2025.

North Node in Aries, South Node in Libra (2023-2025)

With the North Node in **ARIES**, our next soul mission is to work on cultivating the fiery warrior within, which means being more independent and doing things on our own terms rather than following the crowd or waiting for permission. This may sound familiar with Jupiter already in Aries! Collectively, we are learning how to take charge, assert ourselves, hold our ground, and be unwavering in who we are and what we stand for. We are growing into our inner warrior, pioneer, entrepreneur, and leader, embracing our authority instead of giving it away to another.

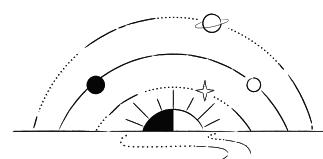

To tap into Aries energy, work on being more direct, honest, and straightforward in how you express yourself and care for other people. Rather than beating around the bush or trying to play both sides (the shadow side of Libra), we must learn how to stand firm in our convictions. Practicing power poses or performing candle magic can help bring out this fire. We should also work on living in the present moment and focusing on the here & now, rather than dwelling on the past or holding onto grudges. Presence is what breeds power, and allowing ourselves to fully engage in each moment will bring the confidence we need to move forward in leaps and bounds.

This will be a good year for sports, exercise, physical endeavors, healthy competitions, winning personal battles, and embarking on a new beginning. We may see advancements in entrepreneurship, leadership, and self-guided ventures.

On the flip side, with the South Node in **LIBRA**, we will need to work on letting go of co-dependency, neediness, and people-pleasing tendencies that negate our independence and personal power. Instead of trying to toe the line or appeal to everyone, we will be better off when we say what we really feel and prioritize our needs first in a healthy and self-respecting way. How can we be assertive rather than passive aggressive?

KEY DATES

- April 20:** New Moon Solar Eclipse in Aries
- May 5:** Full Moon Lunar Eclipse in Scorpio
- July 17:** North Node enters Aries, South Node enters Libra
- Oct 14:** New Moon Solar Eclipse in Libra
- Oct 28:** Full Moon Lunar Eclipse in Taurus

Since Libra is the sign of partnership, we are likely to see major shifts in our personal relationships and the way we work with one another, which may mean ending toxic relationships, letting go of grudges, seeing the other perspective, and finding healthy compromise. Whatever does not support healthy relations is due to be transformed and released. While 2023 plants the seeds of this change, the end results may not be fully seen until 2025!

Eclipses of 2023

ECLIPSES are super-charged moons that bring the hand of fate to our current life direction. If we have fallen off-track from our higher path, eclipses are what help us make a course correction. They are instruments of destiny delivering fated events, inevitable life changes, and destined encounters. In order for an eclipse to occur, the moon must conjoin with either the North Node and South Node. That's what makes eclipses so powerful!

Note that you will feel the effects of an eclipse more strongly if you have planets in these signs.

On April 20th, we see a New Moon Solar Eclipse in Aries, bringing an ultra-powerful new beginning. This is the best moon of the year to start something fresh or embark on a new path! Whatever is getting in the way of your independence & warrior attitude may be addressed around this time. This is a North Node eclipse, which aligns us to our future destiny.

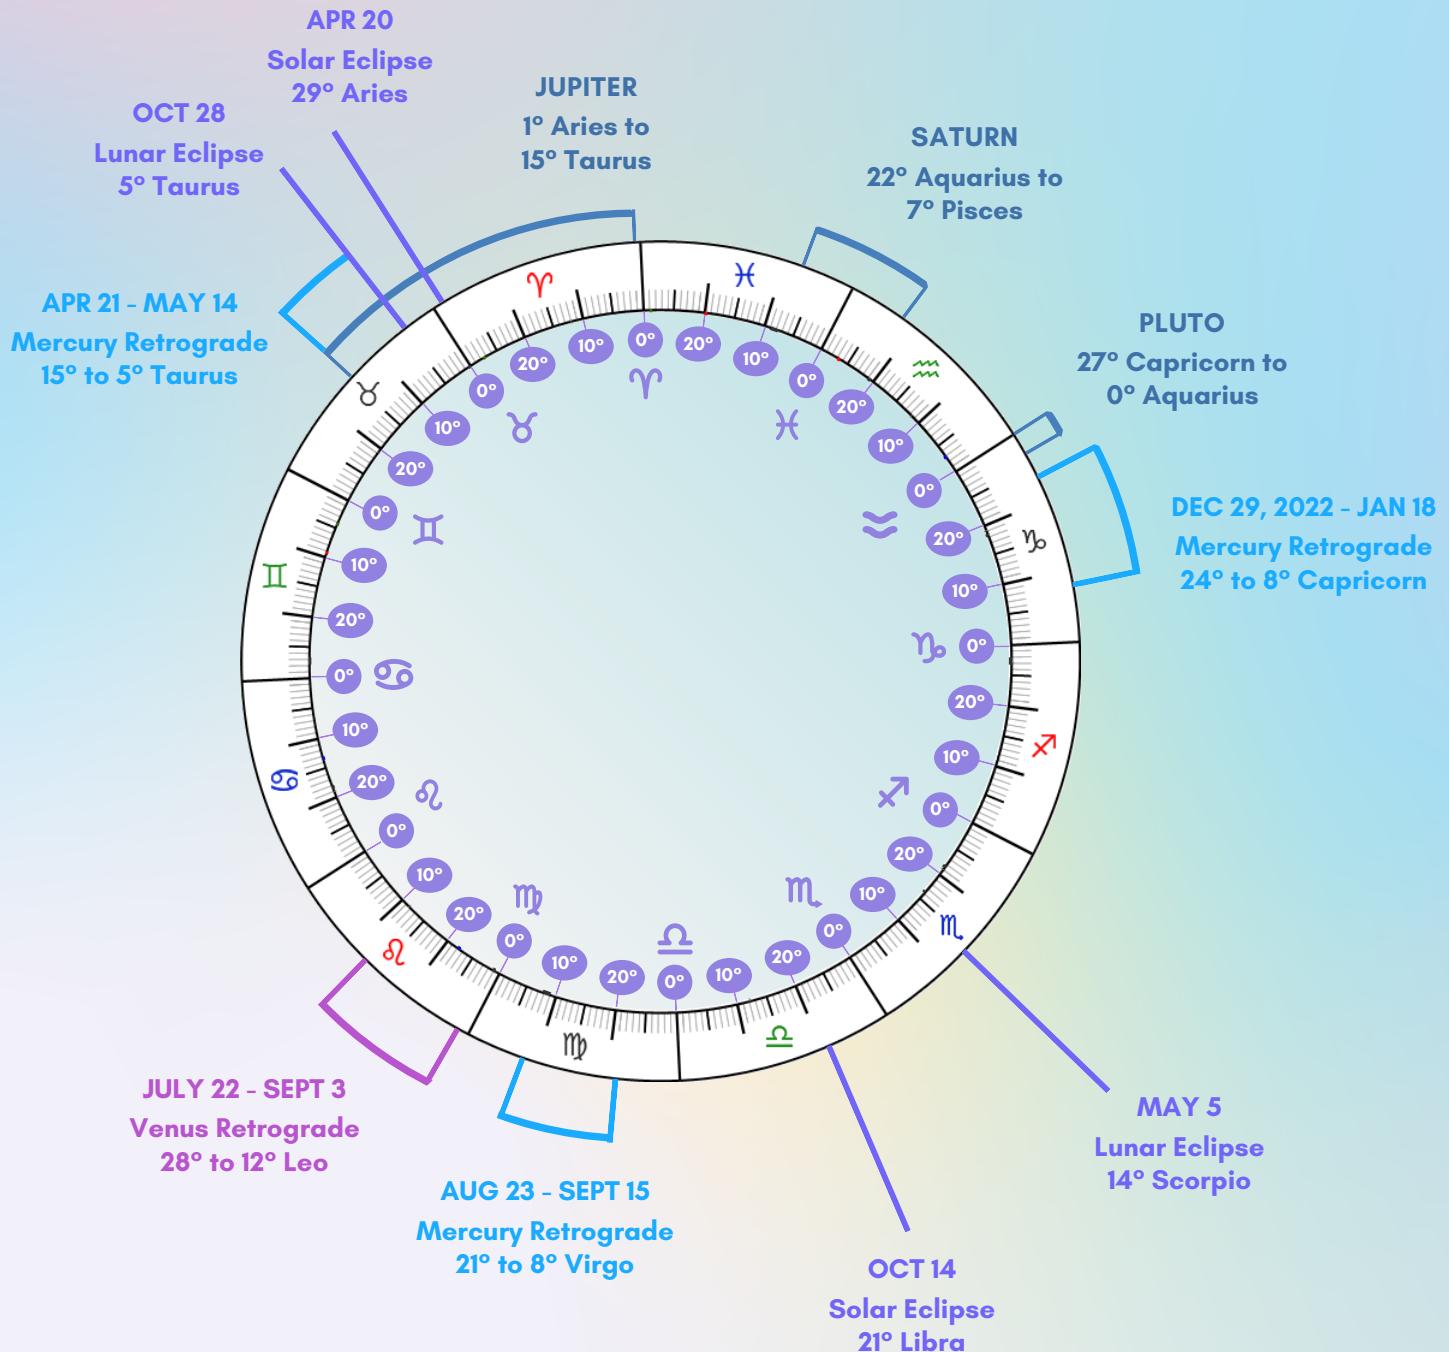

On May 5th, we see a Full Moon Lunar Eclipse in Scorpio, bringing a timely transformation or an ending in personal and emotional matters. This is a South Node eclipse, which means we are releasing past baggage. There may be shocking or unexpected events around this time as the moon opposes Uranus.

On October 14th, we see a New Moon Solar Eclipse in Libra, bringing a fresh start in the realm of relationships. This is a great moon to invite greater harmony, cooperation, and compromise. But this is still a South Node eclipse, which means we may need to revisit the past or close old chapters in order to move forward. Or, a past relationship may gain new life.

On October 28th, we see a Full Moon Lunar Eclipse in Taurus, bringing a transformation, ending, or celebration in money matters. If you have been working diligently & persistently in the Taurus way, you will reap the rewards of your efforts around this time. This is a North Node eclipse, which brings manifestation and a push to be better aligned to our highest path.
